DIAMOND CERTIFICATION

Report:

Origin Certification:

ORIGIN: CANADA

CANADA

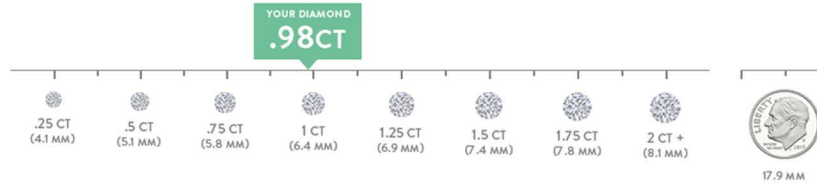

Our Canadian diamonds originate from the Diavik and Ekati mines, which meet rigorous environmental standards and are held strictly accountable to independent environmental monitoring agencies. Both mines have demonstrated a strong commitment to hiring local Aboriginal people, providing a skilled apprenticeship program and improving the average income and unemployment rate. The Diavik mine was recently voted as one of Canada's top 100 employers due to their dedication

to community development programs and the health, safety, and welfare of their employees.

Brilliant Earth goes above and beyond the current industry standards to guarantee that our diamonds originate from pure, ethical sources. We guarantee that our diamonds are untouched by all human rights abuses and are mined in accordance with fair trade principles to empower communities.

DIAMOND CUT: VERY GOOD

IDEAL CUT DIAMOND

The cut refers to the angles and proportions of a diamond. The cut of a diamond - its roundness, its depth and width, the uniformity of the facets - determines its beauty. The skill with which a diamond is cut determines how well it reflects and refracts light.

[Learn More](#)

VERY GOOD

Superior quality cut that reflects nearly as much light as the ideal cut while at a substantially lower cost. Top 15% of diamond quality.

COLOR: J

Color is the natural color visible in a diamond and does not change over time. Colorless diamonds allow more light to pass through than a colored diamond, releasing more sparkle and fire. Acting as a prism, a diamond divides light into a spectrum of colors and reflects this light as colorful flashes called fire.

J NEAR COLORLESS

Color slightly detectable when compared to diamonds of better grades, a good value.

CLARITY: VS1

A diamond's clarity refers to the presence of impurities on and within the stone. When a rough stone is extracted from carbon deep beneath the earth, tiny traces of natural elements are almost always trapped inside and are called inclusions.

AFFORDABLE ENGAGEMENT RINGS

SUN, NOV 1, 2015

An engagement ring is one of life's most significant purchases, in more ways than one! At Brilliant Earth, we understand that an engagement ring is a monumental gift, a special commitment, and an investment too. Don't be daunted by cost—there are many options available for affordable engagement rings. Of course, the meaning of "affordable" is highly subjective. But while budgets may differ, everybody has one—read on to make the...

THE GLOBAL GOALS AND THE JEWELRY TRADE

MON, OCT 19, 2015

Fighting injustice, ending hunger, healing the environment—we can all agree that these are vitally important endeavors, and that they're only attainable if the whole world comes together to work on them. So it's wonderful news that last month the United Nations identified 17 goals that will advance the fights against injustice, poverty, and climate change by 2030. Named the Global Goals for Sustainable Development, these 17 objectives may...

15 AMAZING FACTS ABOUT DIAMONDS

Celeste Perron

124 83 62

Diamonds are the birthstone for the month of April, meaning that April-born ladies have an extra reason to ask for gifts of sparkling diamond jewelry (or buy diamonds for themselves). To celebrate these dazzling gemstones, we've rounded up fifteen interesting facts and bits of lore about diamonds' origins and history:

1

The ancient Romans and Greeks believed that diamonds were tears cried by the gods or splinters from falling stars, and Romans believed that Cupid's arrows were tipped with diamonds (perhaps the earliest association between diamonds and romantic love).

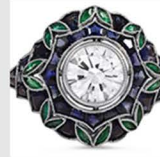

2

Diamonds are billions of years old—in some cases more than three billion years old.

BOSTON ENGAGEMENT RING TRENDS

Brilliant Earth

Bostonians take style very seriously—we know because we are lucky to work with many customers from the Boston area and thrilled to announce the opening of our first Boston showroom in January 2016. When it comes to engagement and wedding rings, Boston couples go for quality and favor classical beauty with subtly creative twists. Here's a look at the trends in engagement and wedding rings in this historic city:

ELEGANT, FEMININE ENGAGEMENT RINGS

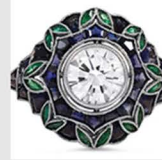

SHOP NOW ↗

Women in Boston are more likely to choose engagement rings that are timelessly beautiful. Solitaire styles are sought after here compared to other cities, as are rings with delicate and gently curving bands. While super-sparkly halo styles are popular in other parts of the country, Boston brides-to-be are more likely to wear engagement rings featuring just a few glittering accent diamonds. The nature-inspired Willow Diamond Ring (seen above) and Petite Twisted Vine Ring feature curving bands and are among the most sought after styles with our Boston couples. Elegant, classic solitaires like the 2mm Comfort Fit Ring are also especially popular in Boston.
